

Ranger Hydraulic Liner Hanger

The Ranger Liner Hanger is a heavy duty rotating hydraulic liner hanger which is typically run with the Scout Liner Top Packer. The proprietary pocketed slip system is designed for high hanging capacity loads and provides drill-in and rotating capabilities in a wide variety of applications.

FEATURES & BENEFITS

- Low-profile design for improved bypass area
- Appropriate for drill in and reaming liners
- High hanging load and tensile capabilities
- Integral bearing provides ability to rotate while cementing
- Dovetail “pocketed” slip-and-cone design for superior initial hanging and overall load performance
- Anti-preset feature in slip retainer ring prevents slips from prematurely activating during run-in
- Premium thread standard

RANGER HYDRAULIC LINER HANGER

SIZE in	CASING WEIGHT	MAX O.D. in	MIN I.D. in
