

# T-Port Frac Sleeve

The T-Port Frac Sleeve is a ball activated frac sleeve designed for use in multi-zone completions in both open hole and cemented applications. The Frac Sleeve utilizes incrementally sized ball seats and can be run in multiple quantities and is compatible with TEAM's dissolvable balls.

## FEATURES AND BENEFITS

- The internal locking mechanism ensures that the frac ports remain fully open once the sleeve is activated
- The ball seat is drillable resulting in a full-bore ID matching the pipe size
- Available in materials suitable for standard or sour service
- Rated at 350°F and 10,000 psi
